

## Lyrics to Michael Spencer's Rap

Be careful with water you waste when you wet hands.  
'Cuz the wasted water goes straight to the wetlands.  
So do all you can before we're drinking sea sand.

'Cuz H<sub>2</sub>O fuels upward flow.  
Water is a part of us from head to toe.

You wouldn't be alive if deprived from water so take five or you'll never  
survive.

We can't let this endeavor be forever alive.  
We can't keep wasting water hopin' more will arrive.  
Without drive to save water we will never have thrive.  
I'm talkin' 'bout the future, I ain't talkin' 'bout I.

I'm on a rescue mission for H<sub>2</sub>O 'cuz we waste water fast and save it slow.  
It is not ok to enslave the flow. You're just diggin' in graves for H<sub>2</sub>O.

We engrave the Earth for the next generation so all operation should be  
conservation. To the best of our ability our main game's to maintain  
sustainability

We need to be inspired by nature like biomimicry.  
Love the earth with care and sensitivity.  
'Cuz there will be no sympathy.  
The only people left to care in the end is you and me.

So let's save our future sons and daughters.  
And take action now before we lose our water.
